

Server Colocation

that lets you focus on your business

Reduce your infrastructure, security, and connection costs by up to 80%!

With our Managed Colocation services you can avoid the hassles and costs of server management and focus your energy and resources on your core business.

SystemAlert™ Managed Service provides incremental backup of your server data every day; a complete backup of your server's data every week and e-mail notification and alerts of the status of your server based on SNMP monitored events.

SecurePlus™ Managed Service delivers all the benefits of SystemAlert™ plus an added level of protection against would-be intruders, malicious code and external attacks by placing your server behind an enterprise class network firewall.

Complete Server Management Service includes all of the above features plus security patch management, hot fixes and service packs.

By selecting Pathway's Managed Colocation services, you may rest assured that Pathway's expert team and enterprise grade systems are up looking after data backup, alert notification and firewall needs. Let Pathway worry about connectivity, security, and reliability for your servers - we've been doing it since 1995.

About Pathway

Established in 1995, Pathway Communications was the first Canadian company to offer a unified portfolio of Internet, Network Integration and software development services from a single source. Our Managed Internet, Data Centre and Colocation Services are available in Ontario, Quebec, British Columbia, Alberta, Manitoba and Nova Scotia. Pathway is committed to innovation, quality and customer satisfaction and strives to deliver sustained value to client. Pathway Communications has the distinction of being showcased as a success story by Sun Microsystems and was the first Internet Service Provider in the world to acquire ISO 9002 certification. Pathway is now certified under the new ISO 9001-2008 standard and all key technical staff and managers are ITIL certified. Pathway is part of the Pathway Group of Companies (www.pathcom.com), which offers Internet, IP Telephony, IT Management and BPO services to clients across Canada and employs over 140 staff in Toronto, Montreal and India.
